LANGUAGES

- English - Fluent
- German - Beginner

RELEVANT SKILLS

- Languages & Frameworks: PHP (Laravel, Symfony), JavaScript
- Database: MySQL, SQL optimization
- Version Control: Git
- Optimization: Performance tuning, query optimization
- Core Skills: MVC architecture, REST APIs, Agile
- Additional skills: University level of C++, Java, Python, Javascript, HTML, CSS.

EDUCATION HISTORY

2011-2016 Romain Rolland Foreign Language School - Stara Zagora

- English, German, Bulgarian, Mathematics

2016-2020 New Bulgarian University

- Informatics

WORK EXPERIENCE

Intern

Cleversoft Group Gmbh

October 2018 - March 2019

- During my 6-month internship at Cleversoft, I gained hands-on experience across multiple teams, including the Core Java, CRM, and Web Development teams, building a diverse foundation in software development and team collaboration.

Application Specialist

Cleversoft Group Gmbh

March 2019 - April 2020

- Developed and maintained web applications using PHP and Symfony Framework, contributing to backend and frontend features.
- Created and optimized responsive HTML, CSS, and JavaScript code to ensure cross-browser compatibility and improve user experience.
- Assisted in debugging and troubleshooting, resolving issues to enhance application stability and performance.
- Collaborated with senior developers on projects, gaining hands-on experience with the full web development lifecycle.
- Followed industry best practices, including MVC architecture and version control (Git), to deliver reliable and scalable solutions.

SOFT SKILLS

- **Problem-Solving:** Ability to troubleshoot and resolve issues effectively.
- **Attention to Detail:** Ensuring code quality and accuracy in development.
- **Collaboration:** Experience working in cross-functional teams, collaborating with designers, product managers, and other developers.
- **Adaptability:** Quick to learn and adapt to new tools, technologies, and environments.
- **Time Management:** Skilled in balancing multiple projects and meeting deadlines.
- **Communication:** Clear and effective communicator, both with technical and non-technical team members.
- **Continuous Learning:** Eager to stay updated on the latest industry trends and technologies.

Software Performance Engineer

ATek Experts

December 2020 - December 2021

- Monitored and analyzed software performance for Microsoft Dynamics, identifying and resolving performance bottlenecks to enhance system efficiency.
- Troubleshooted and optimized custom client extensions for Dynamics, improving application responsiveness and user experience.
- Conducted SQL query optimization to increase database performance, reducing query response times and improving overall system throughput.
- Managed Microsoft Azure cloud resources, configuring and scaling resources to support high-performance requirements.
- Oversaw database management tasks, ensuring data integrity, security, and efficient database structure for optimal performance.

Backend Web Developer

SiWeb Studio

May 2023 - Present

- Developed and maintained backend systems using PHP and the Laravel framework, implementing RESTful APIs and complex business logic.
- Designed and optimized relational databases (MySQL), ensuring data integrity and performance through efficient schema design and indexing.
- Utilized Git for version control, collaborating with team members and managing code across multiple branches.
- Deployed applications to production environments and managed servers, ensuring smooth deployments and high availability.
- Performed ongoing system maintenance, monitoring for issues, and applying updates for improved security and performance.
